FIRST NATIONAL BANK OF VANDALIA CHOOSES MERIDIAN IN-HOUSE

PADUCAH, Ky. – (November 13, 2007) – The First National Bank, Vandalia, Illinois, has signed a contract to begin using McCoy Myers & Associates' Meridian in-house banking solution. McCoy Myers & Associates (McM) is a subsidiary of Computer Services, Inc. (CSI) (OTCQX: CSVI).

The First National Bank (FNB), located just east of St. Louis, Missouri, has been in operation since 1865, making it one of the oldest banks in the country. A long and strong history of growth and an advocate of in-house banking systems continue to describe the bank. In fact, its continued growth is what led FNB to look for a solution that would totally integrate all the bank's products and services. According to Ernie Chappel, President and CEO of FNB, "We were ready for a system that would take us to the next level."

FNB was one of the first ten imaging customers of Summit Financial Solutions, another subsidiary of CSI. When CSI acquired Summit earlier this year, FNB began to learn more about CSI's people and products, particularly the McM Meridian in-house system. "We already had a great working relationship with Summit, and as we began to learn more about the systems and staffs of both CSI and McM," added Chappel, "we liked what we saw and heard."

"To be honest, we're not looking forward to the conversion, but we are looking forward to the integration opportunities the Meridian in-house system will bring to FNB," stated Chappel.

"FNB serves 50% of the market share in our community," added Chappel. "We're committed to looking for new and better ways to deliver our products and services, and we believe that CSI and its subsidiaries, McCoy Myers & Associates and Summit Financial Solutions, can help us keep our commitment."

"We were looking for a showcase bank for our Meridian product in Illinois, and we couldn't have found a better partner than First National Bank," stated CSI Sales Manager Andy Burkett. "We expect to have a long and successful partnership."

Bill Maxwell, Vice President and Sales Manager for McM added, "Once again the joint marketing efforts of McM and CSI have produced a great first client in a new market. We believe First National Bank is the perfect customer to help grow McM's in-house processing business in Illinois."

The intent of FNB remains the same as it was in 1865 - to help provide financial services for its customers and to actively promote the well being of its communities. CSI and McM look forward to supporting FNB's intent.

About McCoy Myers & Associates

McCoy Myers and Associates, Inc. (McM) was founded in 1980 and currently serves 150 community banks in Kansas, New Mexico, Oklahoma, Texas, and Nebraska from its headquarters in Amarillo, Texas. McM's Meridian banking system is designed for community banks and is offered as an in-house application or through a service bureau arrangement. Approximately 60 percent of McM bank customers utilize the in-house Meridian banking system product. The Independent Bankers Association of Texas has presented its Five-Star award to McM for six consecutive years. The Five-Star award is presented to "the company that routinely provides not just excellent service, but also innovative solutions that help their banks grow faster, enhance profits and gain efficiency."
